2.7- Business Continuity Policy Statement

	TERRA INTERNATIONAL CONSTRUCTION LLC	Form No:TIC-QAQC-HO-Form-01	
	QAQC DEPARTMENT	Rev. No.: 00	Edition No.: 01
	BUSINESS CONTINUITY STATEMENT POLICY	Implementation Date : Oct 2021	Pages:1 of _
		Last Rev. Date : Oct 2021	

Introduction

Terra International and Construction LLC is committed to providing the best possible experience to its customers and the best possible relationships with employees, subcontractors and suppliers. To ensure the consistent availability and delivery of its products and services, TIC has developed the following business continuity and disaster recovery (BCMS) policy in support of the comprehensive program for BC, DR and overall business survivability.

TIC is like any other construction firm, it's exposed to potential risks that could disrupt or destroy critical business functions and/ or the production and delivery of Company's services. Our strategy for continuing business in the event of an incident is to ensure the safety and security of all employees; and to continue critical business functions, production and delivery of products and services from predefined alternative sites.

Purpose and Scope

The purpose of the BCMS policy is to ensure that all Company business activities can be kept at normal or near-normal performance following an incident that has the potential to disrupt or destroy the Company. The scope of this policy is the entire Company, its subsidiaries, offices and employees in the U.A.E.

Business Continuity Management System Procedure:

In order to maintain the Business Continuity effective and efficient, the following procedure have been prepared and fully adhered:

1. Approach Procedure for BCMS Implementation
2. Procedure for identification of applicable legal and regulatory requirements
3. Procedure for Scope Documentation and Implementation
4. Procedure For Competencies of personnel and training
5. Procedure For Communication with interested parties
6. Procedure for business impact analysis
7. Procedure For Risk assessment and management
8. Procedure for Business Continuity Management
9. Procedure for Incident response system
10. Procedure For BCMS exercise
11. Procedure for business continuity strategy
12. Procedures for restoring and returning business from temporary measures
13. Procedure For process wise BCP
14. Procedure For Management Review
15. Procedure For Documented Information Control
16. Procedure For Corrective Action
17. Procedure For Control Of Record
18. Procedure For Internal Business continuity Management System Audit
19. Procedure for control of nonconformity and improvement

	TERRA INTERNATIONAL CONSTRUCTION LLC	Form No:TIC-QAQC-HO-Form-01	
	QAQC DEPARTMENT	Rev. No.: 00	Edition No.: 01
	BUSINESS CONTINUITY STATEMENT POLICY	Implementation Date : Oct 2021	Pages:2 of _
		Last Rev. Date : Oct 2021	

Statement of Policy

Each department in the Company is responsible for maintaining the current and comprehensive business continuity plans (BCP) for its operations. Certain departments, such as QUALITY ASSURANCE QUALITY CONTROL (QAQC), are also responsible for disaster recovery plans (DRP) to ensure that any damage to critical projects can be quickly minimized and that these assets can be restored to normal or near-normal operation as quickly as possible.

Each plan was included the procedures and support agreements which ensure on-time availability and delivery of required products and services. Each plan must be certified annually with the business continuity policy compliance process through the BCMS Team.

TIC recognizes the importance of an active and fully supported BCMS program to ensure the safety, health and continued availability of employment of its employees and the production and delivery of quality goods and services for customers and other stakeholders. TIC requires the commitment of each employee, department and vendor in support of the activities required to protect Company assets, mission and survivability.

Leadership Authorization Statement

Engr. Atheer Al Khatir/ The Managing Partner is appointed as BCMS Head (Business continuity Manager) in our company. She will handle the responsibility in their work areas for ISO 22301:2019. The BCMS Manager is responsible for ensuring compliance with the ISMS requirements stipulated in the BCMS manual. She is authorized to ensure that the BCMS system is established, implemented and maintained by the company; Business head and all functional heads shall give full support and co-operation to them for effective implementation of documented BCMS system.

Verification of Policy Compliance

BCMS compliance verification is managed by the BCMS Team with support from other relevant internal departments. Each plan defining appropriate procedures, staffing, tools and workplace planning activities necessary to meet compliance requirements. Plan templates have been developed to facilitate the plan development process, and these templates shall be used for all plans. Detailed policy compliance verification activities are defined by the BCMS Team and are included in the Appendix at the end of this policy.

BCMS Compliance Verification is required annually and is facilitated by the BCMS Team. Waivers for temporary compliance verification may be given if a detailed written waiver request issued by the department manager is approved by the BCMS Team corporate management liaison. Maximum delay for compliance is one year from the original date of compliance.

Control of Non-Compliance

In situations where a Company department does not comply with the BCMS policy, the BCMS Team will prepare a brief stating the case for non-compliance and present it to the BCMS corporate management liaison for resolution. Failure to comply with BCMS policies within the allotted time for resolution may result in verbal reprimands, notes in personnel files, termination and other remedies as deemed appropriate.

2021 WAN Awards entry: Al Hosn Landscape - DCT Abu Dhabi

Copy taken from 2021 entry

30 Jun 2021

Al Hosn Landscape by DCT Abu Dhabi is an entry in the Urban Landscape category of the 2021 WAN Awards

Qasr Al Hosn (a 250-year-old Fortification and enveloping Palace) is set amid a natural coastal desert landscape reminiscent of Abu Dhabi's origin. The terrain is a sand flat with minimalist indigenous planting to reflect the topography in which the building was initiated c.1760.

The geometric alignment of the paving and planting acknowledges the immediate urban surroundings and continues the Cartesian city geometry into the plot.

The landscape in this area is a completely different language to that of its neighbours, yet naturally threads together the two to form a coherent experience of the entire site. The inspiration for this pattern is borne from nature as the Voronoi tessellations emerge in different scales in cell structures as well as being apparent in the cracked baked sabkha salt flats of the coastal desert planes of Abu Dhabi.

This architectural device not only unifies the two eras of Modern and Traditional Heritage but also provides a sense of place and time, with Abu Dhabi formerly known as 'Mlih' (meaning Salt), referencing it as a place that the tribes would visit from the hinterland to gather salt for seasoning, preserving food and trade. The polygon shapes form a diagonal pathway through the site along the 'desire line'. As the pathways meander through the park-scape the surrounding topography changes from horizontal planes to slanting surfaces that gradually grow into actual buildings that provide shaded areas for contemplation, culminating with the Al Hosn Musalla, the Mosque, at the northern corner of the site.

Patching of Pipes, Manholes & Hydrostatic testing

TIC operates a fully equipped Leak Sealing Rig capable of testing and sealing pipeline joints of diameters ranging from 150 mm to 1200 mm. Leaks in larger man-entry sewers are dealt with manually by a highly specialized team using efficient injection grouts.

- Slip lining
- Cured in placed liners
- Spiral wound liners
- Sewerage lining
- Segmental lining
- RIB LOC system

Pipe Replacement

TIC is also equipped to undertake the full replacement of any pipework assets whilst over-pumping all flows during the construction activities.

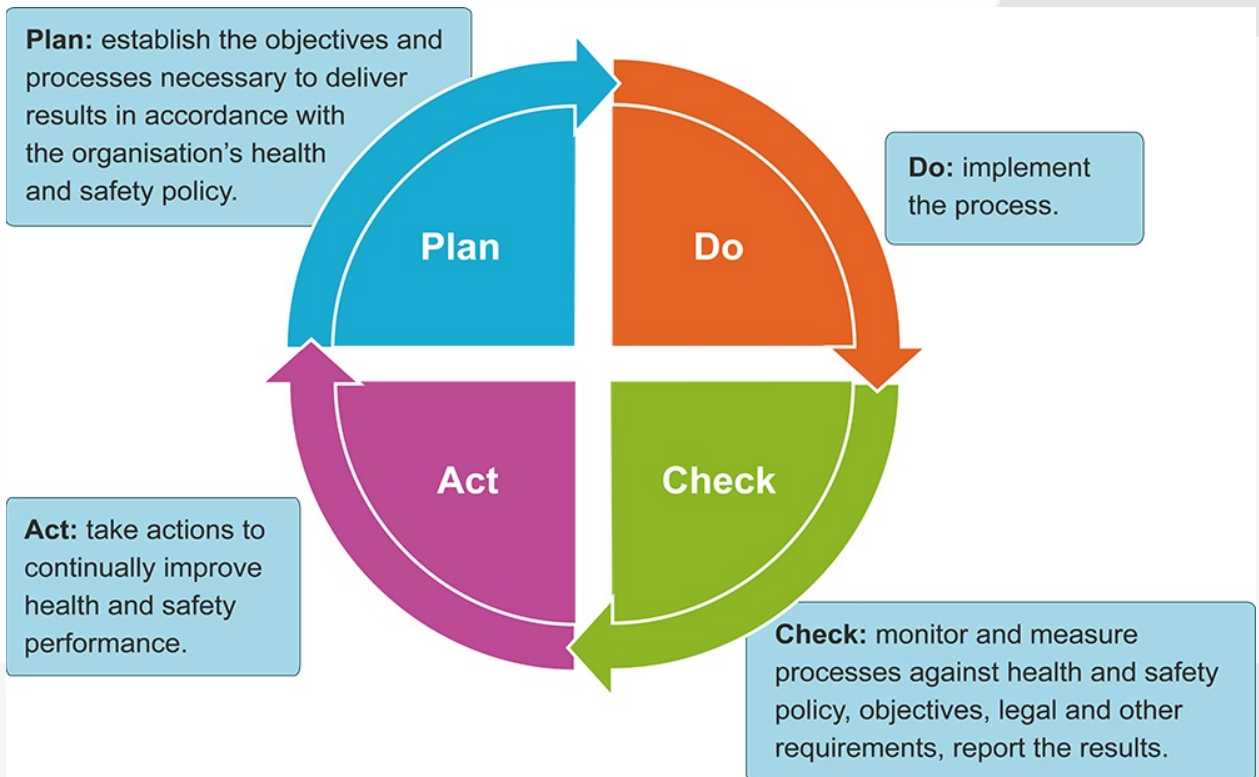

6.1 - Procedures & Quality Assurance Overview

- Terra Construct is an **ISO 9001:2008** certified entity and has a strong and effective Quality management System as Illustrated below.

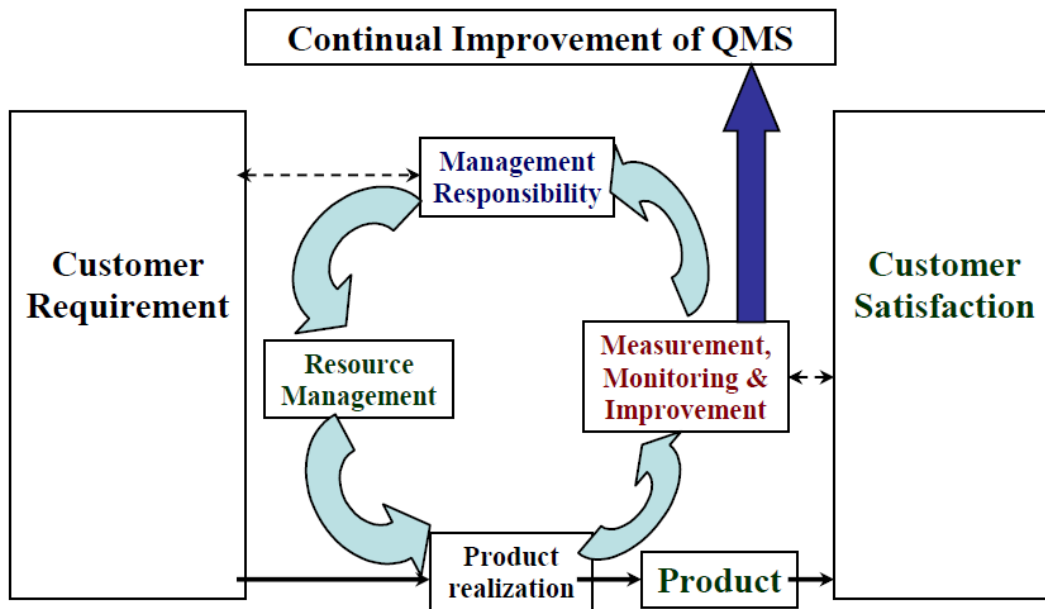

QUALITY MANAGEMENT SYSTEM

- The QMS manual of Terra International Construction is defines the quality management system established to provide conformance to the requirements of QMS ISO 9001:2015.
- TIC QMS manual covers all activities ranging from enquiry receipt, preparing quotations, customer order/ approval, purchasing of materials, planning, project execution, quality control, stores, delivery and all subsequent activities within the organization.
- All outsourced processes are identified and controlled through purchasing process. The Quality Management System also describes the arrangements for process sequence and interaction, employee competence, the suitability of suppliers and the arrangements for preventing nonconformance, customer satisfaction, improvement and preventive action together with systematic auditing and review of the entire system.
- Our QMS have been created to insure proper implementation of the PDCA approach and Process-Based quality management system.

6.2 - Implementation of The PDCA Approach

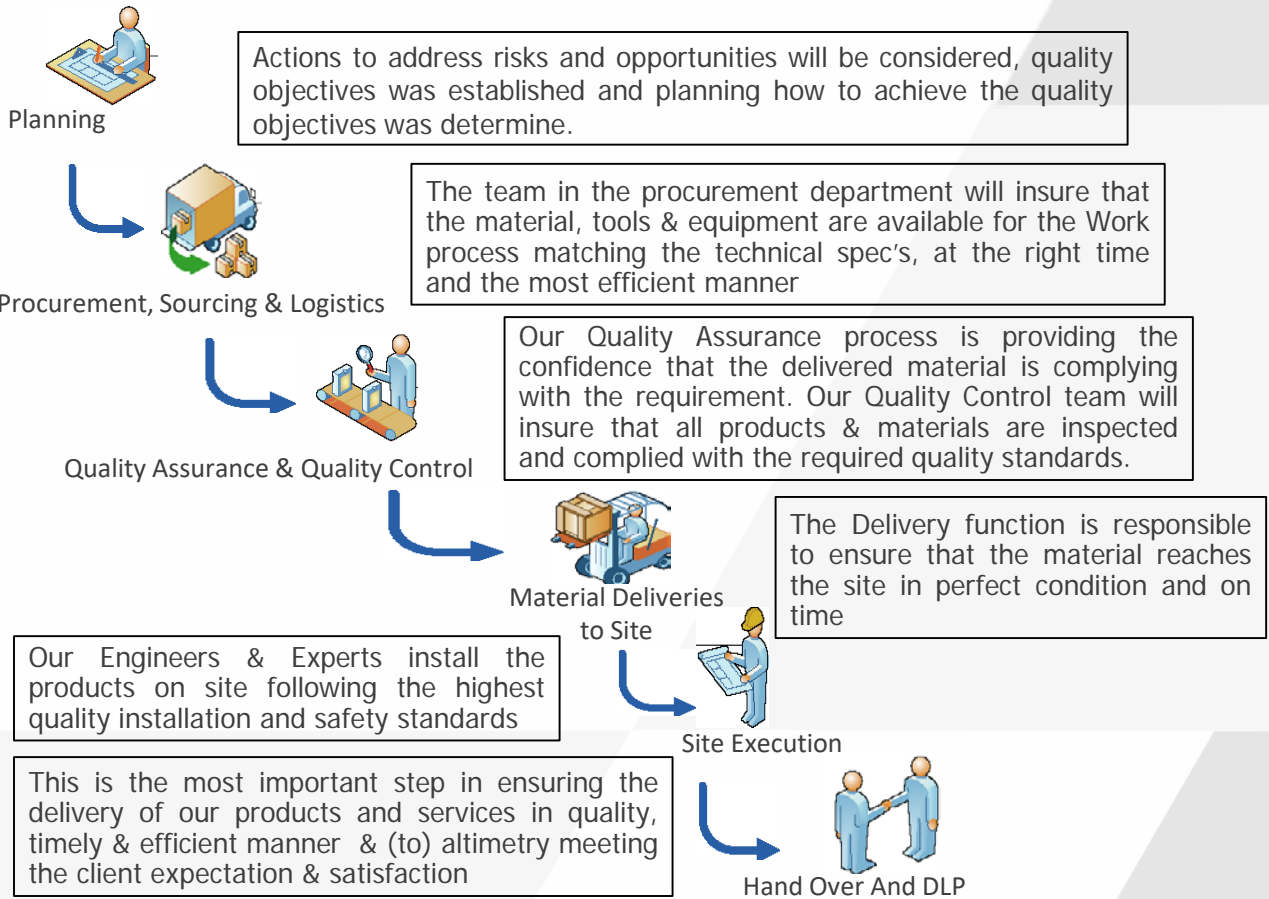

6.3 - Implementation of Process-Based Quality Management System

- Understanding and meeting requirements.
- The need to consider processes in terms of added value.
- Obtaining results of process performance and effectiveness.
- Continual improvement of processes based on objective measurement.

6.4 - Procedures & Quality Assurance

6.4 - Procedures & Quality Assurance

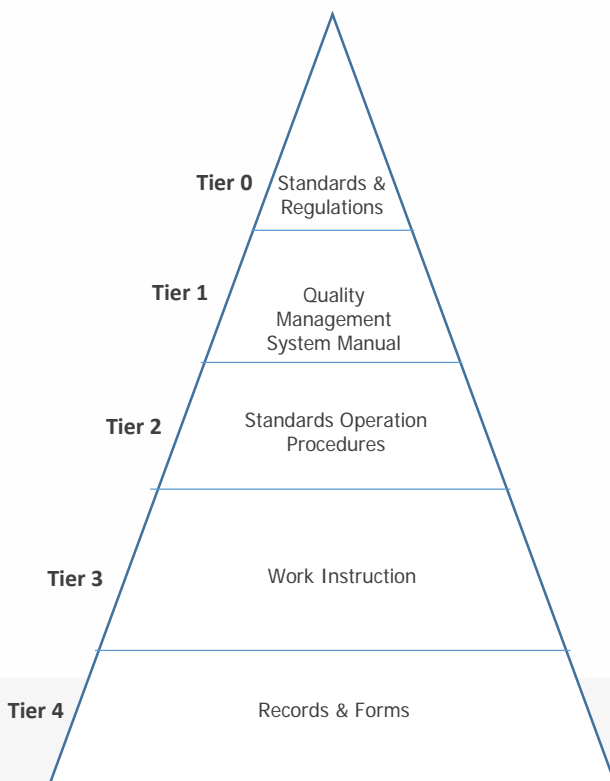

Figure 2: Documentation Hierarchy

- Tier 0 is the regulatory and industry requirements and standards under which TIC operates.
- Tier 1 is the TIC Quality Management System Manual. This Manual documents the company policies and provides the relationship of the TIC Quality Management System to the requirements of ISO 9001:2015.
- Tier 2 is the quality system standard operating procedures (SOPs) that detail the activities necessary to achieve the objectives of the Quality Management System.
- Tier 3 of documentation is work instructions that may be issued as required.
- Tier 4 is various records and forms used in the system that may be issued as required.

6.5 - Project Quality Plan

Each project has a quality plan to insure a proper implementation of the QMS in order to achieve the quality objectives and the end user satisfactions.

The PQP will include but not limited to the following items:

1. Introduction
2. Scope and Principal Parties
3. Project Details
4. Project Organisation
5. Document and Records
6. Internal Audits Schedule
7. Project Administration
8. Rectifying The Non Conforming Products
9. Correction, Corrective & Preventive Actions
10. Quality Control Procedures
11. Resource Management
12. Subcontractor Management
13. Project Close Out

- **OSH Risk Management**
- **Training and Awareness**
- **OSH Incidents**
- **Communication and Consultation**
- **Monitoring Inspection and Auditing**
- **OSH-CMP Review and Update**
- **Project Operational Control Procedures**
- **Hazard and Risk Register**

7.3 - Environment Health Safety System

- Terra International Construction believes that importance of Safety is beyond measures. Our emphasis is on ensuring Environmental Protection, Human Health and Safety Operational Safety and the Community where we operate.
- Following listed goals will be strived for and will be maintained to be at the high required standard.
- Develop and implement an Environment, Health and Safety Management throughout the organization.
- Comply with AD EHS center and Industrial Zone Corp. Environment, Health and Safety elements, mechanism and code of practice to our operations.
- Implement a risk identification program.
- To prevent accident and cases of work- related illness
- Policies and procedures to enhance Environmental, Health and Safety management.
- EHS performance will be reported, measured and reviewed.
- Accident, dangerous occurrence, near misses reported and analyzed, investigated.
- Adequate EHS resources allocated i.e competent supervisor, training facility and finance.
- Communicate openly with all workers and ensure an understanding of EHS policies standard, program and performance.
- Striving towards continuous improvement in respect to Environment, Health and Safety.

8.1 – Sustainability Statement

Date: 26 Mar-2022

Ref: Ref: TIC-QAQC-MP-ESTIDAMA-001-00

In implementation of the late Sheikh Zayed bin Sultan Al Nahyan's dream, and in line with the Abu Dhabi Strategic Plan, and the directives for applying green building specifications on all buildings in the Emirate of Abu Dhabi as per the best environment-friendly international standards adapted to local conditions of the Emirate of Abu Dhabi to keep Abu Dhabi a healthy city that follows the highest standards of sustainable development and has clean pollution-free environment, Terra International Construction LLC Believe that Estidama is an aspiration - a manifestation of visionary governance that puts emphasis on carefully and responsibly managed development.

Thus, Terra have been committed to implement all sustainability requirement based on the local statutory requirement in line with the International requirement in order to support the following purposes of Estidama:

1. Estidama regulations are improving the performance of buildings in Abu Dhabi by reducing the consumption of energy, water and materials, improving public health, safety and general welfare.
2. Enhancing the planning, design, construction and operation of buildings to create an excellent city that provides the essence of success and comfort of living.
3. The regulations intend to support Abu Dhabi Strategic Plan, create a more sustainable urban environment and extend the ability of the Emirate's infrastructure to meet the needs of future development.
4. Sustainability is the practice of creating structures and using processes that increase the efficiency of resource use -energy, water, and materials- while reducing building impacts on human health and the environment during the building's lifecycle, through better siting, design, construction, operation, maintenance, and removal.

Terra paid a great attention to sustainability and Estidama requirement and promotes sustainability in how buildings are designed, built, and operated. Thus, Terra performing and successfully handover the following projects which achieved **3 Pearl Rating**.

1. Discovery Park South at Masdar City.
2. Space Agency Park a Masdar City.

ص. ب 44456 ابو ظبي الامارات العربية المتحدة هاتف +971 2 666 6121 فاكس +971 2 666 0321

P.O. Box: 44456 Abu Dhabi, United Arab Emirates Telephone: +971 2 666 6121 Fax: +971 2 666 0312

	TERRA INTERNATIONAL CONSTRUCTION LLC	Form No:TIC-QAQC-HO-Form-01	
	QAQC DEPARTMENT	Rev. No.: 00	Edition No.: 01
	Sustainability Statement	Implementation Date : Oct 2021	Pages:2 of 2
		Last Rev. Date : Oct 2021	

Moreover, Terra have been parts of many projects which achieved **2 Pearl Ratings** including but not limited to the following projects:

1. Al Ain Hospital International.
2. Yas South Development
3. Yas Arena
4. Masdar Neighborhood

Based on the above, Terra International Construction **awarded a membership** in the **United State Green Building Council USGBC** as an **active member**.

USGBC is best known for the development of the Leadership in Energy and Environmental Design (**LEED**) green building rating systems and Green-build, a green building conference and expo that promotes the "green building" industry, including environmentally responsible materials, sustainable architecture techniques and public policy.

This membership will allow us to share their mission to transform the way buildings and communities are designed, built, and operated through **LEED**—enabling an environmentally and socially responsible environment that improves the quality of life.

USGBC has developed a variety of programs and services, and works closely with key industry and research organizations and federal, state and local government agencies, and by sharing this programs with Terra, it will support and enable us to achieve the Estidama objectives.
